

BUMIARMADA

## Alley of Commonwealth in Astrakhan

On 6<sup>th</sup> October, 2017, employees from our Bumi Armada Caspian LLC office in Russia and the mayor of Astrakhan, Oleg Polumordvinov planted 12 blue spruces in the city's Central embankment. These trees were presented to the city residents in honor of the city's 300<sup>th</sup> year anniversary.

“There was a time when the most common landscape for the Astrakhan region was the endless prairie! Unfortunately, with modernization, we have lost a lot of natural forest. Planting these blue spruces, in commemoration of the city's 300th year anniversary and the Year of Ecology, will help maintain the city's past whilst we move towards the future” said Artem Popov, our General Director.

“It is hoped that in future these trees will thrive and will be a favorite place for guest and city residents of Astrakhan. As an office, we were glad that we could have played such a small role in giving back to the community in which we operate out of” continued Artem.
